Mathematics and Computers in Simulation 33 (1992) 631–634
North-Holland

Contents of Volume 33 (1992)

Number 1, July 1991

Modified importance sampling for performance evaluation and sensitivity analysis of computer simulation models, *R.Y. Rubinstein (United States / Israel)* 1
Design of function-generating mapping networks by interactive neural-network simulation, *G.A. Korn (United States)* 23
Computing some elementary functions of a complex variable, *P. Midy and Y. Yakovlev (France)* 33
A solution technique for random and nonlinear inverse heat conduction problems, *R. Riganti (Italy)* 51
2-D transonic calculations on a flow-based grid system, *R.M. Barron and R.K. Naeem (Canada)* 65
Book Reviews, *W.F. Ames and C. Brezinski (United States / France)* 69
News of IMACS 87

Number 2 (Collected papers of the IMACS / IFAC Workshop on Computer-Aided Control Systems Design), August 1991

Preface, *V.I. Venets (USSR)* 111
Support system for processes of designing organizational mechanisms, *V.N. Burkov, S.P. Kolesnikov and A.V. Schepkin (USSR)* 113
LATOR — professional database management system for local networks, *J. Demetrovics, Gy. Gyepesi, L. Hannák, T. Remzső and F. Urbánszki (Hungary)* 121
Information system for insurance companies (ABLAK), *J. Demetrovics, L. Hannák, A. Heppes, T. Remzső and F. Urbánszki (Hungary)* 129
R-technology and CASE: analysis and perspective, *W.K. McHenry (United States)* 139
Moduli-based language for building problem-solving scenarios, *G. Simov and I. Popchev (Bulgaria)* 151
Computer-Aided Control System Design for drilling systems, *W. Wajs and M. Capik (Poland)* 165
Ada: progress in the West and the East, *P. Wolcott (United States)* 173
Book Reviews, *W.F. Ames and C. Brezinski (United States / France)* 175
News of IMACS 185

Number 3, November 1991

Comments on decouplings and Euler's one-step schemes, *A. Singh (India)* 197
A numerical approach to evaluate the describing function (DF), *F. Ballesteros (Spain)* 205

Elsevier Science Publishers B.V.

Energy control of the numerical solutions of an elastic oscillator, *I-S. Liu and I. Suliciu (Brazil / Romania)* 209
A survey on computer generation of some classes of stochastic processes, *I. Popescu and I. Vaduva (Romania)* 223
The numerical solution of random initial-value problems, *D.G. Harlow and T.J. Delph (United States)* 243
Book Reviews, *W.F. Ames and C. Brezinski (United States / France)* 259
News of IMACS 263

Number 4 (Collected papers of the IMACS / IFAC Workshop on Computer-Aided Control Systems Design), December 1991

Organization of computer-aided design systems, *E. Artamonov (USSR)* 275
A framework for research of information processing hierarchy in enterprise, *S. Gudas (Lithuania)* 281
Managing the development of large-scale systems, *A.V. Karibskii (USSR)* 287
On some applications of form management, *P. Kerékfy and T. Remzső (Hungary)* 295
Computer-aided design of the optical devices control systems based on the language of algebraic computations FLAC, *V.L. Kistlerov, P.I. Kitsul and B.M. Miller (USSR)* 303
Structured Analysis Technique and Technology in control systems design, *V. Kovács and G.L. Kovács (Hungary)* 309
Using Petri-nets for data processing systems analysis and synthesis, *V.V. Kulba and A.R. Shvetsov (USSR)* 317
Design of medical information system for dynamic control, *A.R. Kulmagambetov and I.R. Kulmagambetov (USSR)* 323
Computer-aided design of distributed databases, *I.A. Uzhastov (USSR)* 331
Logical control of flexible integrated manufacturing, *S.A. Yuditskiy and S.S. Pokalev (USSR)* 339
News of IMACS 349

Numbers 5–6 (Selected papers of the MSSA / IMACS 9th Biennial Conference on Modelling and Simulation), April 1992

Preface, *D.G. Mayer and A.J. Jakeman (Australia)* 357
Managing Natural Systems
A systematic approach to modelling the dynamic linkage of climate, physical catchment descriptors and hydrologic response components, *A.J. Jakeman, G.M. Hornberger, I.G. Littlewood, P.G. Whitehead, J.W. Harvey and K.E. Bencala (Australia / United States / United Kingdom)* 359
A metapopulation simulation model for assessing the likelihood of plant and animal extinctions, *H.P. Possingham, I. Davies, I.R. Noble and T.W. Norton (Australia)* 367
Embedding a rangeland simulation model within a decision support system, *J.A. Ludwig, R.E. Sinclair and I.R. Noble (Australia)* 373
Habitat modelling and simulation for nature conservation: A need to deal systematically with uncertainty, *T.W. Norton and J.E. Williams (Australia)* 379

Induction of sets of rules from animal distribution data: A robust and informative method of data analysis, *D.R.B. Stockwell and I.R. Noble (Australia)* 385
Evaluation of field sampling strategies for estimating species richness by Monte Carlo methods, *H.M. Neave, R.B. Cunningham, T.W. Norton and H.A. Nix (Australia)* 391
Simulation of animal cell metabolism, *J.P. Barford, P.J. Phillips and C. Harbour (Australia)* 397
Managing Agricultural Systems
The development and use of models and expert systems to aid the control of crop pests in China, *Z.R. Shen (China)* 403
Optimising cultural practices for grain sorghum in relation to climatic risk at three locations in the United States, using the SORKAM model, *T.J. Gerik, L.J. Wade, W.D. Rosenthal and R.L. Vanderlip (United States / Australia)* 415
A simulation model to estimate effects of farm management and pest populations on yields of cultivated mushrooms, *A.D. Clift and M.A. Terras (Australia)* 421
Minimising soil erosion and runoff by maximising cropping opportunities, *C. Carroll, M. Littleboy and M. Halpin (Australia)* 427
OZCOT: A cotton crop simulation model for management, *A.T. Wells and A.B. Hearn (Australia)* 433
Adaptation of CLIMEX for spatial screwworm fly population dynamics, *D.G. Mayer, M.G. Atzeni and D.G. Butler (Australia)* 439
Sterile insect release method — Optimal strategies for eradication of screwworm fly, *M.G. Atzeni, D.G. Mayer and D.G. Butler (Australia)* 445
Dissipation of spatial closure benefits as a result of non-compliance, *D.J. Die and R.A. Watson (Australia)* 451
Modelling of dynamic management for decision support, *R. Monypenny (Australia)* 457
Using spatial land resource data and computer simulation modelling to evaluate sustainability of wheat cropping for a portion of the eastern Darling Downs, Queensland, *M. Littleboy, M.J. Grundy, M.J. Bryant, D.O. Gooding and B.W. Carey (Australia)* 463
Mathematical Methods
Linking mathematics with applications: The comparative assessment process, *B. Anderssen (Australia)* 469
Testing and re-calibrating a simple model of daily rainfall for use in eastern Australia, *J.B. Robinson (Australia)* 477
On the use of extreme value distributions for predicting the upper percentiles of environmental quality data, *J. Bai, A.J. Jakeman and M. McAleer (Australia)* 483
Comparison of methods for simulation of two dimensional data honouring specified spherical semivariograms, *P.I. Brooker, G.C. Cock and M.A. Stewart (Australia)* 489
Non-parametric smoothing of almost annually periodic time series, *M.F. Hutchinson (Australia)* 495
The characteristics of dynamic systems via the Swept Sine Wave technique, *N. Haritos (Australia)* 501
Derivation of dynamic estimation equations by means of the Dirac delta function, *P.R. Benyon (Australia)* 507
A simulation approach to analysis of free replacement policies, *D.N.P. Murthy, B.P. Iskandar and R.J. Wilson (Australia)* 513

Econometrics
Modelling in econometrics: The deterrent effect of capital punishment, *M. McAleer (Australia)* 519
An application of optimal control analysis to the lifecycle model, *E. Aiyoshi and A. Maki (Japan)* 533
Estimation of long-run responses in dynamic models with integrated data, *R. Bewley and D.G. Fiebig (Australia)* 539
Bootstrap estimates of a new classical model of unemployment, *M. McAleer and J. Smith (Australia)* 545
Housing purchase and saving behavior under unanticipated inflation, *M. Takase (Japan)* 551
On the distribution of intra-daily exchange rate changes, *R. Bewley, P. Lowe and R. Trevor (Australia)* 557
A study of various score test statistics for heteroscedasticity in the general linear model, *A.D. Hall (Australia)* 563
The distribution of the full information maximum likelihood estimator, *K. Oya and K. Morimune (Japan / Australia)* 569
MLE of some continuous time financial models: Some Monte Carlo results, *Y.K. Tse (Singapore)* 575
Environmental Models
Economic modelling and Australian carbon dioxide emissions, *M.S. Common (Australia)* 581
A global three-dimensional Lagrangian tracer transport modelling study of the sources and sinks of nitrous oxide, *J.A. Taylor (Australia)* 597
Shoreface translation model: Computer simulation of coastal-sand-body response to sea level rise, *P.J. Cowell, P.S. Roy and R.A. Jones (Australia)* 603
Groundwater modelling and optimal salinity control in the North Stirling Land Conservation District, Western Australia: A hydrogeological and economic perspective, *J. Gomboso and F. Ghassemi (Australia)* 609
